Step 3: The Smart Way to Promote

Here's where most people go wrong - they just take their affiliate link and start sharing it everywhere. That's like trying to sell to strangers without having a conversation first!

Setting Up Your System

Instead of paying for expensive tools like ClickFunnels (\$127-297 per month), you can use [Systeme.io](https://www.systeme.io)'s free plan to start. Here's what you'll need to set up:

- 1. A Landing Page**
 - This is where people first arrive
 - It should offer something valuable for free
 - Ask for their email address in exchange
- 2. Email Collection System**
 - When someone gives you their email, they join your list
 - This lets you follow up with them multiple times
 - Remember: most people don't buy on their first visit!
- 3. Follow-up Emails**
 - Set up automated emails that go out over time
 - Share valuable information and tips
 - Include your affiliate link naturally in the emails

Why This Works Better

Think about it - if you just share an affiliate link:

- People might be busy when they see it
- They might not trust the product yet
- They could forget about it later

But with an email list:

- You can reach people multiple times
- Build trust over time
- Catch them when they're ready to buy
- Share success stories and testimonials

The Numbers Game

Here are some interesting statistics:

- Direct affiliate links typically only convert 1-5% of potential sales
- With email marketing, you can capture 95-99% of potential sales
- About 70% of sales come from email marketing follow-ups

Setting Up Your Email Sequence

In [Systeme.io](#):

1. Create a new automation
2. Set up a trigger (when someone joins your list)
3. Create a series of follow-up emails
4. Space them out over several days
5. Mix valuable content with promotional messages

Making It Work

To succeed with this system:

1. Drive traffic to your landing page
2. Collect emails consistently
3. Send regular, valuable emails
4. Be patient - success takes time
5. Test and improve your approach
